

AI in UX/UI Design

CURRICULUM OVERVIEW · AGILE DESIGN SCHOOL

Duration: 6 wks months · **Level:** Working designers · **Format:** Live cohorts (weekday evening / weekend / blended) · **Fee:** Rs. 35,000 (EMI available; scholarship discounts up to 30% via the Scholarship Entrance Test)

One of the fastest-growing skills in design — learn to design with AI tools, not be replaced by them.

Who should join

- Working UX/UI and product designers
- Product managers shipping AI features
- Content designers writing for AI interfaces
- Recent graduates future-proofing their skill set

Curriculum, stage by stage

Week 1 · How AI Actually Works

A designer's mental model of modern AI — no math required.

Week 2 · AI Product Patterns

UX patterns for chat, copilots and agents: input, output, feedback, correction and confidence.

Week 3 · Designing for Failure

Uncertainty, hallucination and graceful degradation in AI interfaces.

Week 4 · Trust & Ethics

Consent, bias and transparency — and the dark patterns to refuse.

Week 5 · AI in Your Workflow

Research synthesis, ideation and prototyping with AI assistants — with the judgement kept human.

Week 6 · Capstone

An AI-powered feature designed end-to-end, with a responsibility review.

Learning outcomes

- Design chat, copilot and agent interfaces with confidence patterns
- Handle uncertainty, hallucination and graceful failure in UI
- Accelerate research synthesis and ideation with AI — judgement kept human
- Draw the ethical line: trust and transparency without dark patterns

Assessment & certification

Assessment is based on real project work and a final live portfolio jury — never attendance.
Graduates receive a certificate with a unique, verifiable ID; assessment rubrics are public.
