

Post Graduate Programme in UX/UI Design

CURRICULUM OVERVIEW · AGILE DESIGN SCHOOL

Duration: 11 months · **Level:** Graduates & senior designers · **Format:** Live cohorts (weekday evening / weekend / blended) · **Fee:** Rs. 2,20,000 (EMI available; scholarship discounts up to 30% via the Scholarship Entrance Test)

An 11-month postgraduate pathway for deep UX and UI mastery — advanced research, interaction design, UI systems and a specialisation track, ending in an external jury defence.

Who should join

- Graduates who want craft mastery over survey knowledge
- Practising designers formalising senior-level skill
- Specialists-in-the-making: AI products, service design, Design for Bharat or DesignOps

Curriculum, stage by stage

Term 1 (Months 1–3) · Advanced UX Research

Mixed-methods mastery: interviews, contextual inquiry, diary studies, surveys and honest statistics — run as real studies with real participants, plus ResearchOps foundations.

Term 2 (Months 4–6) · Interaction Design Depth

Complex flows, states and edge cases; forms, errors and recovery; mobile and platform patterns; behavioural psychology applied with ethics.

Term 3 (Months 7–8) · UI Systems Mastery

Advanced visual craft, accessibility to WCAG, token architecture, component APIs and design systems with governance — audited live by a practising systems lead.

Term 4 (Months 9–10) · Specialisation Track

Choose one: Design for AI products · Service Design · Design for Bharat (multilingual, low-bandwidth) · DesignOps foundations — taught seminar-style with domain mentors.

Term 5 (Month 11) · Industry Capstone & Jury

An end-to-end engagement with a partner organisation, defended before an external jury of senior designers — the senior-track proof behind the credential.

Learning outcomes

- Master research, interaction and UI systems at senior depth
- Complete a specialisation track with a domain mentor
- Build systems audited by practising leads
- Defend an industry capstone before an external jury of senior designers

Assessment & certification

Assessment is based on real project work and a final live portfolio jury — never attendance.
Graduates receive a certificate with a unique, verifiable ID; assessment rubrics are public.
