

Professional Certificate in UX/UI Design

CURRICULUM OVERVIEW · AGILE DESIGN SCHOOL

Duration: 4–6 months · **Level:** Beginner / Career switch · **Format:** Live cohorts (weekday evening / weekend / blended) · **Fee:** Rs. 85,000 (EMI available; scholarship discounts up to 30% via the Scholarship Entrance Test)

A complete career-switching programme for students, freshers and professionals who want to enter UX/UI design — from research to a jury-approved portfolio.

Who should join

- College students and fresh graduates building an employable skill
- Software, QA and support engineers who want to shape products, not just build or test them
- Graphic designers upgrading from visuals to product thinking
- Career switchers from any field with curiosity and 8–12 hours a week

Curriculum, stage by stage

Stage 1 · Research Foundations

User interviews, problem framing, personas and journeys — how top teams uncover real user problems before a single screen is designed.

Stage 2 · Structure & Flows

Information architecture, user flows and wireframing — turning research into product structure.

Stage 3 · UI Craft

Typography, colour, layout, components and Figma fluency — interface quality that survives inspection.

Stage 4 · Usability & Iteration

Prototyping and moderated usability testing with real users; evidence-led iteration.

Stage 5 · Client-Style Brief

A real brief with real constraints — scoped, executed and presented the way agencies and product teams work.

Stage 6 · Portfolio & Jury

3–5 case studies, one-on-one portfolio mentorship, and a final live jury review with interview preparation.

Learning outcomes

- Conduct and synthesise user research with real participants
- Translate findings into flows, wireframes and polished, accessible UI

- Test and iterate designs with evidence
- Present and defend design decisions to a live jury — and to interviewers

Assessment & certification

Assessment is based on real project work and a final live portfolio jury — never attendance. Graduates receive a certificate with a unique, verifiable ID; assessment rubrics are public.
